

WATER  TECH

INCREDIBLE WATER

- FROM EVERY FAUCET

## PRO SERIES

When you install a Pro Series water filtration system, premium water circulates throughout your home, improving and elevating everything it touches. If you appreciate the finer things in life, this is the series for you.

# DO YOU KNOW WHAT'S IN YOUR WATER?

## THE 3 C'S IN WATER HARMING YOUR HEALTH AND HOME

### 1 CALCIUM (HARD WATER)

Hard water containing calcium ions, can lead to troublesome mineral deposits in your home, greatly reducing the life of your water heater, dishwasher and washing machine. It can also cause unsightly lime scale buildup on fixtures, glassware and shower glass.

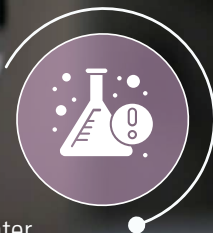

### 2 CHLORINE OR CHLORAMINE

Your city's water treatment process employs either chlorine or chloramine as chemical disinfectants, effectively eliminating bacteria but causing unpleasant tastes, odors, and the formation of harmful byproducts, as well as being harsh on skin and hair and corrosive to plumbing fixtures.

### 3 CHEMICALS

A wide range of chemical contaminants are showing up in water supplies, from pharmaceuticals and VOCs to PFAS, lead, and arsenic. Most of these contaminants could have significant negative effects on your health and well-being.

## THE **PRO** SERIES™ – PROVIDING SOLUTIONS TO THE 3 C'S IN EVERY HOME

ADDRESSES THE FOLLOWING 3 C'S

- Ca Calcium
- Cl Chlorine-or-
- NH<sub>2</sub>Cl Chloramine
- Chemicals

ADDRESSES THE FOLLOWING

- Ca
- Cl
- NH<sub>2</sub>Cl
- Chemicals

### REIONATOR **PRO** **ULTRA**

For those who refuse to compromise on quality, the Reionator Pro Ultra® is for you. It is the top shelf of all water improvement products—it has no peers. Addressing hardness, disinfectants and chemicals, it does it all. In short, the Reionator Pro Ultra® is everything you want.

\*Internal data only. Level of reduction has not been verified by IAPMO R&T. Products should not be used to meet EPA MCL levels without comprehensive water testing and consultation with WaterTech technical support. †Certified to NSF/ANSI Standards 42 for Chlorine Reduction & Certified to NSF/ANSI Standards 44 for Softening Efficiency.

## WATER TEST RESULTS

- Calcium (Hardness) Level:**  gpg  
 0-1 Soft Water / 1-3 Slightly Hard / 3-7 Moderately Hard / 7-10 Hard / 10+ Very Hard
- Chlorine/Chloramine Level:**  ppm  
 See City Water Report. Pools chlorinate at 1-3 ppm.
- Chemicals:** See City Water Report  
 Scan QR code above to see which chemicals are addressed by Pro Series Systems.
